

Khalifa Al Hasan

Fullstack Developer

Software Engineer specializing in Backend Development and DevOps. As a Core Team member at GDG on Campus, I go beyond writing code by fostering talent through mentoring and empathetic leadership. I am a communicative, detail-oriented professional skilled in bridging technical and operational needs—collaborating closely with IT infrastructure teams—to deliver impactful digital solutions.

Address: Kalidoni, Palembang City, South Sumatera

EXPERIENCE

Raden Fatah State Islamic University

Internship - Web Developer

June 2025 - August 2025

- Developed & Managed Academic Portals: Spearheaded the development of the university's academic website using WordPress, integrating critical features for student data management, academic calendars, and faculty information portals.
- Performance Optimization: Engineered performance improvements using caching strategies, image compression, and CDN integration, successfully reducing page load time by 40%.
- Customization & UI/UX: Customized themes and plugins to deliver a professional, responsive interface. Collaborated with the internal IT team to redesign site navigation, ensuring a user-friendly experience for thousands of students and staff.
- SEO Strategy: Implemented comprehensive on-page SEO best practices, which resulted in a 30% increase in organic site traffic within the first six months.

Google Developer Group on Campus

Core Team Backend Development

December 2025 - Present

- Led a squad of 9 backend engineers in the end-to-end development of "GDG Talent Hub," a campus recruitment SaaS, ensuring scalable architecture and efficient delivery.
- Architected a production-grade backend curriculum utilizing Express.js, Prisma, and Supabase to bridge the gap between academic theory and industry standards for new members.
- Mentored the next generation of developers by enforcing Clean Code principles and best practices, significantly improving the team's code quality and deployment readiness.

EDUCATION

Raden Fatah State Islamic University

Information System

Aug 2023 - Present

- Learn basic HTML and CSS with output project: company profile
- Learn laravel programming language and create simple CRUD applications
- Conduct research using a wide variety of qualitative & quantitative methods, including in-depth interviews, usability testing, focus groups, diary studies, and surveys.
